SUMMARY

Pragmatic and results-driven Front-end engineer with +1 year of experience. Proficient in working to produce impactful, leading-edge, user-focused optimized website features that engage customers and deliver business results. Demonstrated excellent skills and understanding of JavaScript and React. Complex problem-solver with an analytical mindset. Fast learner and able to grasp new concepts or adapt to new technologies quickly and efficiently. Dedicated to achieving demanding development objectives according to tight schedules while producing impeccable code in collaboration with a growth-oriented team.

EXPERIENCE

FREELANCE | FRONTEND DEVELOPER

- Built several projects and developed features as per client requests accurately translating their business requirements followed by maintenance and monitoring for a period of time.
- At AFDV Marketing, Software Agency, I developed the new official website for the company using React & Next.js. I built multiple reusable UI components and made sure the project is scalable, easily extendable and pixel-perfect to the Figma design.
- For ARTE.BLVD, Art Shop, I developed the frontend of their eCommerce platform using React, Next.js & TypeScript. I was responsible for building the UI and integrating it with the backend endpoints.
- For Codemy, Coding Courses Provider, I Worked on the prototype of the website using React, TypeScript, RTK, Firebase & Tailwind CSS. I was responsible for building the UI and contributed to the UI/UX design process.
- Technologies used: React, Redux(RTK), Next.js, JavaScript, Typescript, Angular, Bootstrap, Material-UI, MySQL, C#, SQL Server, WPF, Docker.

PROJECTS

HOUSE MARKETPLACE
[Website](#)

- House marketplace is an e-commerce website made with React and Firebase.
  - The website has Authentication Features (sign in, sign up, Google-authentication , forgot password, logout, edit user data).
  - Users only can Manage Ads (create Ads, update Ads, delete Ads).
  - Explore Page has a section for Recommended Ads which holds 5 Ads with discount ,
  - Categories (Rent or Sale), offers Section includes ads with discount only,
  - Libraries (Tailwind CSS, Bootstrap, daisyUI,react-toast,react-router, swiper).

GITHUB FINDER
[Website](#)

- GitHub Finder Simple Application helps you to search for GitHub users' Info like their name, location, website, number of followers, and so on, and their repos information. Made with React JS, React Hooks Like useContext, useReducer, useParams, and useEffect, Restful APIs, React router, Axios library, Styled with Tailwind CSS & Daisy UI.
